

Approval for this bulletin

Subject to priorities defined by the Technical Council and the Presidium, the results of the *fib*'s work in commissions and task groups are published in a continuously numbered series of technical publications called *bulletins*. The following categories are used:

Category:

Technical report
State-of-the-art report
Manual / Guide to good practice / Recommendation
Model code

Approval by:

Task group and chairpersons of the commission
Commission
Technical Council
General Assembly

Any publication not having met the above requirements will be clearly identified as a preliminary draft.

fib bulletin 121 was approved as a technical report by the *fib* Commission 6 in May 2024.

The *fib* Task Group 6.3 “Sustainability of structures with precast elements” includes the following members:

Convener: Albert de la Fuente (Universitat Politècnica de Catalunya, Spain)

Deputy Convener: Irene Josa (University College London (UCL), United Kingdom)

Members: Freddy Ariñez Fernandez (Universidad Politécnica de Madrid, Spain), Iria Doniak (ABCIC, Brazil), David Fernández-Ordóñez (*fib*, Switzerland), Dean A. Frank (Dean Frank Associates, LLC, United States), Jaime Gálvez Ruiz (Universidad Politécnica de Madrid, Spain), Antonello Gasperi (Private, Italy), Petr Hajek (Czech Technical University in Prague, Czech Republic), Alejandro Lopez-Vidal (ANDECE, Spain), Emily Lorenz (United States), Stef Maas (FEBE, Belgium), Stefano Pampanin (Sapienza University of Rome, Italy), Kiran Pandhare (United States), Tomas Plauska (Consolis, Latvia), Alessandra Ronchetti (ASSOBETON, Italy), Koji Sakai (Japan Sustainability Institute, Japan), and Gábor Sándor (Consolis Group, Romania).

Cover image: The office building Oasis in Malmö was delivered to Skanska in 2023 by Consolis Strängbetong and is a building where the customer had strong ambitions of having a low environmental impact. All aspects were considered and resulted in a LEED, WELL and NollCO2 certification. The exterior facade design mimics the scales of the Perch fish (name of the district where it is built) which required advanced matrix casting.
