Part I: Short project notes

A novel method for construction of railway stations based on continuous open caissons	2
<i>Shu Liu Zhongjie Zhang Yong Yuan Luc Taerwe Jiao-Long Zhang</i>	
Structural design of a complex stadium roof: Shanghai Pudong Football Stadium	7
<i>Weizhou Shi Xiaoming Xu Feng Gao Shuangjun Hou Wei Ye Hao Wu Tongyu Zhang</i>	
Structural analysis of a complex stadium: Shanghai Pudong Football Stadium	11
<i>Tianqi Xiong Hao Wu Tongyu Zhang Feng Gao Shuangjun Hou Wei Ye</i>	
High-density geopolymer concrete exposed to marine environment	16
<i>Aziz Hasan Mahmood Chowdhury Zubayer Bin Zahid Stephen J. Foster</i>	
Shaping mechanical properties of concrete elements by 3D-printed plastic gyroid reinforcing elements.....	20
<i>Jacek Katzer Aneta Skoratko Tomasz Szatkiewicz Oldřich Sucharda</i>	

Part II: Papers on Design & Construction

Environmental benefits of marine concrete structures.....	26
<i>Arianna Minoretti Lyubomira Vasileva Tim Fristedt Evert Mul Christian John Engelsen Aad van der Horst Tor Ole Olsen</i>	
A study on the contribution of structural concrete to reduce carbon dioxide emissions of the demand side	48
<i>Akio Kasuga</i>	
Traditional and modern methods of construction: Comparative study of the sustainability of single-family homes	60
<i>Irene Josa Albert de la Fuente</i>	
Sustainability model for precast concrete buildings. Case study: Commercial building in Reggio Calabria (Italy)	79
<i>Irene Josa Andrea Monserrat-Lopez Simona Bianchi Jonathan Ciurlanti Simone D'Amore Stefano Pampanin Albert de la Fuente</i>	
Carbon abatement strategies for bridges in India	102
<i>V. N. Heggade</i>	
Sustainable strategies for sea locks: An LCA study on reinforcement corrosion prevention methods.....	128
<i>Juan Daniel Cassiani Hernandez Amir Rahimi Julia Wünsch Nancy Freitag Vincent Klessing Sylvia Kessler</i>	
Innovation and modernization of Gabčíkovo lock chambers	147
<i>Miloš Zich Michael Trnka Ondřej Šimek</i>	

Innovative design and construction of 220 m high wind turbine tower.....	163
<i>Aibek Toktorbai Long Doansy Freddy Arinez Hugo Corres Javier Martinez Akio Kasuga</i>	
Digital planning, prefabrication and industrialized construction methods in a complex large-scale project in Munich.....	179
<i>Andreas Pürgstaller Hannes Fischnaller</i>	
Parametric modeling for automated intelligent design of concrete beam bridges: A global and local optimization approach	195
<i>Vinicius Nascimento de Moraes Thomaz Eduardo Teixeira Buttignol</i>	
Robotic devices for Structural Health Monitoring.....	216
<i>Marcin Górski Krzysztof Grzyb Jakub Zajac</i>	
Reliability and partial factor-based assessment of a highway bridge supported by nondestructive testing	237
<i>Stefan Küttenbaum Thomas Braml Marco Heinze Christian Kainz Christian Stettner Alexander Taffe</i>	
Structural behavior of deteriorated Gerber half-joints in highway overpasses by nonlinear finite element analysis combined with a simplified uniform-corrosion model.....	257
<i>Dario De Domenico Nino Spinella Davide Messina Matteo Mazzeo Antonino Recupero</i>	
Reinforced concrete dapped-end beams for existing bridges: Reliability of finite element models	288
<i>Katherina Flores Ferreira Marco Carlo Rampini Beatrice Belletti Biagio Calcavecchia Guido Camata Danilo D'Angela Chiara Di Salvatore Nico Di Stefano Enrico Faccin Daniele Ferretti Michele Fabio Granata Fabiola Iavarone Lidia La Mendola Gennaro Magliulo Paolo Martinelli Giovanni Menichini Davide Messina Fausto Minelli Maurizio Orlando Giovanni Plizzari Simone Ravasini Antonino Recupero Enrico Spacone Nino Spinella Federico Tuozzo Giulio Zani Marco di Prisco</i>	
Punching assessment of a slab bridge stock in Finland	324
<i>Juuso Auvinen Anssi Laaksonen</i>
